AFTERMARKET WARRANTY CLAIM POLICY

1. In case of any warranty claim please contact our technical support first:
 - a. Hotline number (toll free): 00800-5555-8767
 - b. Email address: schrader-techsupportEU@sensata.com

Our technical support will discuss your warranty claim with you and issue an RMA number in order to identify your claim. In order to determine whether a defective product must be returned for quality inspection Schrader may request photographs and/or additional information.

2. Once you have received the warranty claim form with your RMA number printed on it from our technical support please fill out all required information into the form and attach it to the goods you want to return to us. A received RMA number does not necessarily mean that the claim is accepted. All claims have to be assessed by our technical team which will either accept or reject the claim depending on verification results.
3. Goods have to be send to following address only!
Schrader International GmbH
Gewerbering 10b
82140 Olching
Germany
4. Please note that any goods returned to another address or without correctly filled warranty claim form (especially if the RMA number is missing) will be rejected without any further verification.
5. Schrader warrants all new TPMS sensor parts for 24 months or 30.000 km (whatever comes first) from date of delivery. All other parts (service kits, mounting tools, electronic tools, etc.) will have a warranty of 12 months from date of delivery.
6. Buyer's rights in case of defects shall be excluded in the following events:
 - a. Natural wear and tear
 - b. Defects of the Goods due to reasons for which Buyer is responsible
 - c. Incorrect assembly and/or installation by Buyer or a third party commissioned by Buyer.
 - d. Leakage of sensors in aftermarket rims (Please refer to aftermarket rim manufacturer for compliance)
7. Only genuine Schrader replacement parts purchased through Schrader are covered by this aftermarket parts warranty.
8. Schrader reserves its right to reject warranty claims, explaining the reasoning in writing to the customer. In such cases the product can be collected by the customer from our warehouse at their costs. If the customer refuses to collect the product within 15 working days, it will be scrapped without compensation.
9. If warranty claim has been accepted, reimbursement will be credited exclusively for the respective product, at the price invoiced when sold to the customer. If a duly initiated warranty claim has been recognized by Schrader within the warranty period the commercial partner will get a reimbursement fee of maximum € 17 per sensor/wheel. Reimbursement is only granted if the commercial partner can prove (by means of bills / invoices) that a service action has been performed. This fee covers the costs incurred in the removal, replacement and any need for programming and tuning of the sensor. Apart from that Schrader will not compensate for any additional expenses, such as consequential damages or any other follow-up costs.
10. For all warranty claims the terms and conditions of Schrader International GmbH Aftermarket apply.
